Root Force System

Trees with Power to Grow

Deciduous trees and shrubs sold by the Hendricks County Soil & Water Conservation District are produced by Woody Warehouse Nursery, Inc., located in Hendricks County, using the Root Force System (RFS), a three-step root pruning process that stimulates lateral root production.

Trees grown using RFS are superior young trees from known parent stock. The seed is gathered in the fall and started in wood-heated propagation houses while winter snows blanket the Midwest.

RFS trees have well developed root systems they virtually begin growing as soon as they are planted. They are easy to plant, have a high survival rate and provide quick results.

Each tree is guaranteed by Woody Warehouse to be true to type and in good condition at time of pick up.

Many of the species offered in the sale are native to Indiana and are attractive to various types of wildlife.

Tree and Shrub Prices

3 gallon \$25.00

15 gallon \$125.00

Trees and shrubs are available in the sizes listed after the species description.

SWCD TREE SALE

ORDER FORM

Tree and shrub pick-up is Saturday, October 4 from 8:30 am to 12 pm at the Hendricks County 4-H Fairgrounds, Pavilion A, 1900 East Main Street, Danville, IN 46122.

Limited quantities are available of the following species: *(current height)*

15 gallon Autumn Blaze maple *(8 ft.)*

15 gallon Red Sunset maple *(8 ft.)*

3 gallon Autumn Brilliance serviceberry *(3 ft.)*

3 gallon American hazelnut *(2 ft.)*

15 gallon Overcup oak *(8 ft.)*

15 gallon Bur oak *(8 ft.)*

15 gallon Pin oak *(8 ft.)*

15 gallon Bald cypress *(6 ft.)*

3 gallon Blackhaw viburnum *(30 inches)*

3 gallon American cranberry bush *(30 inches)*

Please call us if you are interested in one of the limited species or if you are interested in a species not listed on the order form.

We can check availability with the nursery.

Thank you for your order! Your purchase shows your support for local conservation. The Hendricks County Soil & Water Conservation District uses funds generated through our tree sales to provide quality cost share and natural resource educational programs to Hendricks County.

Most of the species descriptions used in this brochure were found on the University of Connecticut plant index at <http://www.hort.uconn.edu/Plants>.

Make your new tree count! Report it as a part of the Central Indiana Plant-A-Million campaign by going to the program website. Residents of the area have reported over 300,000 trees planted to date.

‘Autumn Blaze’ Maple (Acer x freemanii)

Fast growing with strong wood, reaching a mature height of 40-50 feet and 25-35 feet in width. Grows in part shade to full sun and tolerates most soil types and conditions. Outstanding bright red to orange fall color. The roots are less aggressive than those of silver maple, making it a good street tree.

3 gallon container current height 5 feet

‘Red Sunset’ Maple (Acer rubrum ‘Red Sunset’)

Grows up to 50 feet in height and a 40 feet spread. Brilliant orange to red fall color. A good shade tree and an excellent choice for lawn or street planting. Tolerates partial shade.

3 gallon container current height 5 feet

Speckled Alder (Alnus rugosa)

Grows 10-30 feet tall in full sun in moist soils, usually forming clumps or thickets. Catkin-type flowers open in early spring. Brown cone-like fruits, 1/2 inch long, mature in late summer, and persist into winter.

3 gallon container current height 5 feet

Serviceberry (Amelanchier canadensis)

A multi-stemmed, deciduous large shrub or small tree which grows 6-20 feet tall. Prefers full sun and wet sites. Transplants easily. Branches are usually pruned up like tree to view bark. White flowers in late March. Red fruit turns black when ripe. Fruit is sweet and edible, if you can beat the birds to it. Makes good jellies and pies. Bark is gray-silver and striped. Gold fall leaf color.

3 gallon container current height 30 inches

Black Chokeberry (Aronia melanocarpa)

A multi-stemmed, deciduous shrub adaptable to many conditions. Tolerant of both dry and wet soils. Full sun or partial shade, but best flowering, fruiting and fall color in full exposure. Clusters of small, white flowers in May. Has purplish-black fruit. Excellent fall foliage colors of orange, burgundy and purple. Generally grows 3 to 5 feet tall, but can get larger.

3 gallon container current height 18-24 inches

Northern Pecan (Carya illinoensis)

Native tree reaching 100 feet high. Good shade tree, long-lived with strong wood. Very slow growing. Wet area adapted, but grows better in well-drained soils. Requires full sun. Nuts are eaten by a variety of mammals, including humans.

3 gallon container current height 3-4 feet

Red Osier Dogwood (Cornus sericea)

A native multi-stemmed shrub growing 6-10 feet tall with an equal or greater spread. White flowers bloom late May to early June. Fruits are white to pale blue in color in August and September. Leaves turn purple-red in fall. Reddish stems are the key ornamental feature of this shrub, providing winter interest. Periodic removal of old stems produces vigorous new shoots with vivid stem color. Adaptable to many soils, but likes moisture. Plant in full sun to light shade.

3 gallon container current height 30 inches

Black Walnut (Juglans nigra)

A large deciduous tree that grows 50-75 feet tall with an oval, open crown. Yellow fall foliage. Fruit is a nut with a semi-fleshy covering green changing to black and breaking open when ripe. Nuts are edible with a bitter taste. Prefers moist, well-drained soil, rich and deep soil in full sun. Use as a lawn tree in parks and wide open spaces. Has a compound called juglone which inhibits some plants from growing near the tree.

3 gallon container current height 5 feet

Eastern Red Cedar (Juniper virginiana)

An evergreen tree native to east and central North America. Grows 40-50 feet tall by 8-15 wide, although usually smaller than this. Needles are medium green in color and have a bronze cast during cold months. Needles have a strong cedar scent to them. Berry-like cones, mature in one year and have a waxy, blue appearance. Reddish brown bark shreds in long strips. Easily transplanted. Tolerant of most conditions and useful in difficult sites; pH adaptable, prefers full sun. Use as a specimen, screen, and for windbreaks. Excellent wildlife species.

3 gallon container current height 24-30 inches

Common Ninebark (Physocarpus opulifolia)

Growing 6-10 feet tall with an equal width, this multi-stemmed deciduous shrub has excessively peeling, tan to reddish brown bark. Whitish pink flowers bloom May to June. Reddish fruit ripens in September to October. Transplants readily and is adaptable to many conditions. Grows in full sun to partial shade. Benefits from renewal pruning.

3 gallon container current height 30 inches

Swamp White Oak (Quercus bicolor)

Native tree grows to 60-70 feet high and has a narrow crown with often drooping branches. The foliage turns brown or red in autumn. Swamp White Oak is wet area adapted but will grow any where, and will tolerate some shade.

3 gallon container current height 5 feet

15 gallon container current height 8 feet

Shingle Oak (Quercus imbricaria)

Shiny, un-lobed leaves distinguish this species from many oaks. Reaches 50-100 feet tall. Prefers moist, well-drained, acidic soils, in full sun. Tolerates urban conditions.

3 gallon container current height 4 feet

15 gallon container current height 8 feet

Overcup Oak (Quercus lyrata)

Relatively rare native tree reaches 60-90 feet in height. Smooth, whitish, irregularly peeling bark. Leaves turn yellow, orange and red in the fall. Probably the most adapted of all of the oaks to wet areas, but will also tolerate drier upland sites. It has some shade tolerance.

3 gallon container current height 4 feet

Red Oak (Quercus rubra)

Fast-growing, native oak grows 60-90 feet in height. The leaves usually turn red in the fall. Grows well in moist, loamy, sandy, rocky & clay soils; it transplants easily and is hardy in city conditions. Needs full sun.

3 gallon container current height 4-5 feet

15 gallon container current height 8 feet

Elderberry (Sambucus canadensis)

A deciduous multi-stemmed shrub native to eastern United States. It has a broad and rounded crown, arching branches and a fast growth rate, generally reaching 5-12 feet tall. White flowers in July form showy, edible purplish-black fruit that matures in September. Fruit is a bird favorite. Yellowish-green fall color. Prefers moist soil, pH adaptable and transplants easily. Use in the landscape for naturalized effect and moist areas.

3 gallon container current height 3 feet

Bald Cypress (Taxodium distichum)

This large, native *deciduous* conifer reaches 100-120 feet tall and is the longest-living tree species in the Eastern U.S., sometimes reaching 1,000 years of age. Needles turn reddish brown in autumn before falling off. Bald Cypress is known for its resistance to decay and its “cypress knees” which often project from submerged roots when grown in extremely wet sites. While it is very tolerant of wet sites, the best growth is on moist soils that are moderately well-drained, and are in full sun.

3 gallon container current height 3 feet

Arrowwood Viburnum (Viburnum dentatum)

This deciduous, multi-stemmed shrub typically reaches 5 to 9 feet tall and wide. Fall color is dependent on the individual plant and can be yellow, red or reddish-purple. Small creamy white flowers are held in clusters and bloom from late May to early June. Blue-black berries are enjoyed by birds. Grows in full sun to partial shade and is adapted to dry to very wet soil conditions.

3 gallon container current height 30 inches

Nannyberry Viburnum (Viburnum lentago)

This deciduous, multi-stemmed shrub reaches 12 to 15 feet tall or larger and can be trained as a small tree. Small, creamy white flowers in flat clusters bloom from mid to late May. Fruit color changes from green to yellow, pink, rose and finally to blue-black. Fruit is most appealing before it turns blue black during the color transition. Attracts birds and wildlife. Very adaptable to many sites; grows in sun or shade and tolerates moist and dry soils.

3 gallon container current height 30 inches
